

To the federal communications Commission: I am a 24 year old citizen of the United States. I believe your recent crackdown of media outlets is in direct conflict with what principles put the U.S. on the map. The Federal Communications Commission is a waste of taxpayers money and time. Stop interfering with our right to be entertained. Entertain the idea that censorship is backed behind a world of fear and ignorance. It is time to stop fighting those who have a right to speak and be heard. NOT TO REPRESS OR DENY THEIR EXISTENCE! To do so is vain and old fashioned. To do so inhibits the progression of our society and promotes a lost schizophrenic society who has been tamed by their master.
